

INSIGHT UP FRONT. SAVINGS FOR YEARS.

TAKE THE GUESSWORK OUT OF PAVEMENT MAINTENANCE

Introducing our exclusive **Engineered Pavement Solution** to all preferred Pavecon customers.

You need to maximize every dollar spent on maintaining your facilities, and we know how frustrating it is when you make an investment that doesn't live up to its anticipated lifespan.

Our new Engineered Pavement Solution (EPS) is designed to ensure that you avoid those pitfalls and boost your pavement assets—it includes geotechnical analysis of your project site, an objective, drone-based, technological pavement score, and high-quality pavement repair with an extended warranty.

At no additional cost to you. You win.

- Highly detailed, drone-based surface investigation by leading national pavement management firm Atlas10, including a technical, data-driven pavement assessment and targeted maintenance strategies
- Pavement development and repairs executed by Pavecon, a responsive, reliable construction firm with an extensive service footprint through our national partner program
- Extended limited warranty on work performed under the Engineered Pavement Solution—an impressive increase over industry standard
- Premier EPS also includes a geotechnical site investigation by a respected global engineering firm, including core samples, soil report, and pavement design criteria to ensure that your project is built upon the best foundation for lasting results—with an annual reassessment to maintain the warranty

PAVECON

When you choose to work with Pavecon, you will benefit from data-driven insight and expert information which delivers a short, medium, and long-term plan updated annually at no cost to you.
